PROFILE

Result-driven Full-Stack Software Engineer and Product Builder with a strong foundation in UI/UX design, graphic design, and brand identity. Experienced in building and scaling 20+ production web applications and multi-tenant SaaS platforms using Laravel, React.js, and PostgreSQL. Highly skilled in managing Linux VPS droplets, containerizing stacks using Docker, and optimizing database schemas. Proven track record of independently delivering end-to-end digital systems and engaging multimedia content.

EXPERIENCE

Full Stack Software Engineer — Sajilo Website

2023 – Present

High-performance full-stack web solutions and DevOps administration for startups and businesses.

- Engineered and launched 15+ production-grade web applications utilizing Laravel, Next.js, React.js, and TypeScript in Agile/Scrum environments.
- Integrated secure REST APIs, JWT Authentication, and automated Stripe payments, delivering seamless transactions and robust user security.
- Optimized system responsiveness and real-time operations using Redis caching and WebSockets, reducing application latency by 40%.
- Spearheaded containerization (Docker) and CI/CD pipelines (Git/GitHub Actions), accelerating developer setup and code release stability.
- Deployed machine learning capabilities via AI Integration (OpenAI API) and verified codebase reliability using comprehensive Unit Testing.

E-Commerce Developer, Graphic Designer & Video Editor — Drishti Ventures & Mero Eye Foundation

2021 – 2023

Multimedia design, e-commerce development, and coordination of digital operations.

- Designed and produced 100+ high-engagement social media graphics and marketing videos using Adobe Creative Suite (Photoshop, Illustrator, Premiere Pro, After Effects).
- Developed, launched, and maintained a WordPress-based e-commerce platform ('drishtiventure.com'), expanding customer reach and boosting sales.
- Managed online learning operations, Google Meet schedules, portal structures, and provided technical support for class sessions.
- Recorded, edited, and optimized educational training content for YouTube, increasing student engagement.
- Implemented SEO optimizations and performance tweaks, accelerating page load speeds by 30%.
